

almex.infobox

Multifunctional Terminal

ALMEX

A trademark of Höft & Wessel

With the almex.infobox by Höft & Wessel you can create your individual terminal solution with the twinkle of an eye!

The centre-piece of the almex.infobox is a solid base stand to which all terminal components may be added fast and in a flexible way. The basic equipment contains a high-resolution 15"-display with touch screen as well as a powerful PC.

In the base stand various components can be integrated fast and easily. This is particularly the case for advertising media, starting with a simple banner or brochure shelf up to a backlit or dynamic display.

Individual applications can now be created on the basis of standard components thanks to the modular structure of the almex.infobox. The design ranges from decently plain on to the attractive eye-catcher.

Take advantage of a highly individual terminal which comes along with comparably low price and which may be realised within a short period of time.

Technical Data

Basic module basic frame

- Case of steel and aluminium
- Dimensions:
560 x 1740 x 620 mm (W x H x D)
- The device is realised as stand-alone solution
- Ambient conditions: indoor

Personal Computer

- Personal Computer with state-of-the-art technology, e.g.
 - Pentium processor e.g. 1 GHz
 - 128MB RAM
 - 20GB hard disk
 - Various interfaces

Touch screen

- Touch-resistive surface
- 15,1" operating surface, surface-wave-technology
- Resolution: 1024 x 768 pixels

Display

- Brilliant 15,1" display
- Resolution: 1024 x 768 pixels
- 16Bit colours

Software

- Operating system Windows 98 (optional Windows 2000/NT)
- Application software according to customer requirements

Options/Accessories

- Camera
- Chip and/or magnetic card reader
- Loudspeaker system with sound card
- Telephone
- Video support
- Microphone
- Printer
- Barcode scanner
- Keyboard and trackball

Services

Höft & Wessel offers an extensive service package to implement your software successfully.

This includes:

- Software-design and programming
- Design-aid
- IT-concept
